

CCHM Family Matters @ School

I.Q.E.Q. Multiple Intelligences

When we say that a child is intelligent, we usually only focus on his or her academic performance. Children are social, emotional, physical, thinking & learning beings. When we nurture children, we must look at their “whole being” and not just some aspects of their development.

Based on Harvard University’s IQEQ theory, parents and children will learn to:

1. Understand the 8 types of Multiple Intelligences
2. Identify the strengths & potential in your child
3. Build bond through the I.Q.E.Q. games
